Interference TVI

SOLVED with Filter1

This pattern may appear (or you actually see nothing blanks out) your TV screen if you are picking up signals from an VHF or UHF transmitter or You are using and transmitting from your home and interfering with your own and neighbors TVs.

Do not Fear

There is a simple solution use the **Filter1** and Your and neighbors problems are gone and you will be able to watch the TV **interference free**. You might have to use more than one of the filters depending on your TV Instalation and strength of the interfering Signal.

Filter1 is a Powerfull notch Filter that filters specific Interfieriing Friquency without attenuating your TV Sugal.

Example :

Interfieriing signal attenuation with one filter

VHF 145.000Mhz +- 30dB

UHF 435.000 Mhz +- 20dB

Ocfcourse we can make the filter for just about any interfering frequency with 20 to 30dB attenuation.

Get the distance with Batos Antennas
