1<sup>st</sup> in  
South Africa

### RDF (Radio Direction Finding)

**NEW !**  
Service we offer!  
1<sup>st</sup> in  
South Africa

Radio direction finding or RDF has been around since before World War One. From the time of the invention of radio, there has been a desire to know from what direction a radio signal was arriving at the listener's radio receiver.

**We are capable of tracing VHF or UHF frequencies.**

**Several uses for RDF:**

- Hunting down interfering radio signals, both accidental and malicious interference to repeaters (affecting both ham and commercial communications, including emergency services, CPF, neighborhood watch) etc.
- Helping to locate downed aircraft by DFing their emergency locator beacons (ELT) etc etc.
- The entertaining sport of "fox", "bunny" or T-hunting etc.....

**Well the Profesional RF Hunting services are now available and provided by Batos RTV.**

**And Yes it works & we will find YOU !!!**

Radio Direction Finding is part science part art. It requires knowlidge and skill.
