SHAYA Stick SlimCu1

Ultimate Antenna *Get the distance*

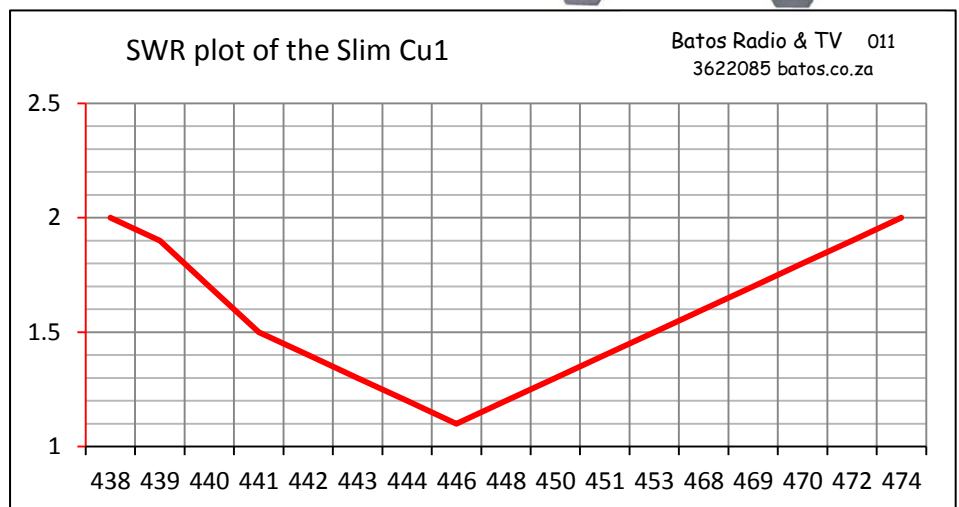

Shaya Stick **SlimCu1** is a **perfectly matched and tuned** antenna (custom made by us) for any specific frequency with 98-99% matching efficiency.

The reduced vertical radiation angle (about 5 to 10 degrees from horizontal) of the properly **Made & Tuned Slim Jim** Antenna made out of Copper tubing results to an apparent horizontal gain of **6dBi** over the most Antenna designs which in turn will give you 4 times more power radiated by antenna hence you will definitely increase the **transmitting & lessening** distance of your rig.

SlimCu1 was designed to perfection with latest computer simulated Antenna software & fine tuned with Antenna Analyzer, Spectrum Analyser, Frequency Counter and SWR Meter and includes Ugly Balloon for a perfect match. Antenna can be used for mobile or home base mount & it comes with the bracket (cable is separate & according to the length you require we tune it to the antennas Frequency so they become one).

**We do not invent antennas .
We simply build them better.**
