Desktop PC was 2m away from FM Radio and radio stations where badly affected (one could hardly distinguish what was played or said and some stations totally Blanked Out) due to the noise coming from the pc power supply even if the pc was in standby mode. By using Batos EMI Filter ofcourse we Removed Noise from the PC and wala all of Fm band was Clear and Usable again.

Not only that Batos EMI Filter Solved FM Radio problem, it has also Reduced Radiated EMI/RFI transmitted Noise (in the air and building mains wiring) and it is NOT any longer in aeria of Danger to ones Health over using the PC for prolonged period of time!

Batos EMI Filter plug and play, I have used to solve the Problem.

My status

Today, 14:40

Mains EMI/RFI Filter, plug and play

Batos EMI Filter plug and play, I have used to solve the Problem.

Batos EMI Filter fitted to the PC which **Removed EMI/ RFI Noise** interfering Signal. 🌟

RF Explorer[®]
Handheld Spectrum Analyzer

Measured EMI signal generated from PC after Fitting Batos Filter. It Has reduced and Removed Noise by something like $92 - 66.5 = 25.5\text{dB}$ (in laymans terms it has attenuated PC interfering Noise by just ove 500 times. ✨

Not only that
Batos Filter
solved FM Radio
problem, it has
also reduced
Radiated EMI
transmitted Noise
that it is not any
longer in a area of
Danger to ones
Health over using
The PC for
prolonged period
of time.,
